

LWR05678
LWR05679

In our average Juno reflectance spectrum we chose to average exposures 5678 and 5679 because they are at similar phase angles (~ 30 deg); exposure 5690 is also at ~ 30 deg but shows a spectral feature different from the others and we're not clear whether this is valid. We include a reflectance spectrum separately for 5690.
