

## OVIRS Outbound Cruise Data Caveats

March 12, 2018 Version 1.0

November 13, 2018 Version 1.1

1. The L+18 extended calibration data on 2018 March 18 are labeled as science, because OVIRS rode along on the OCAMs “plume search” calibration. Please note that there is no target in the FOV.
2. Page 31 of the OVIRS SIS is intentionally blank.
